PRODUCT DATASHEET

Beta LogZ

Reliable and Secure IT Production Driven by Log Data

A log management solution for z/OS. Reliably stores, archives, and provisions vast volumes of log data for audit-proof IT production and compliance.

OBSERVABILITY & COMPLIANCE
LOG & DATA MANAGEMENT
MAINFRAME LOG ARCHIVING
AUDIT-PROOF LOGGING

KEY BENEFITS

Modernizing Mainframe Log Management

Centralize Log Data Management

Consolidate mainframe and distributed log data into one secure, enterprise-wide archive.

Optimize Mainframe Performance

Cut z/OS workload up to 25% using zIIP processors and free up scheduler memory.

Accelerate Troubleshooting & Analysis

Give developers and IT ops direct access to archived logs for faster resolution.

Ensure Audit-Proof Compliance

Meet GDPR, DORA, and NIS-2 standards with tamper-proof, audit-ready archiving.

PURPOSE-BUILT SOLUTIONS

Solving Your Toughest Mainframe Challenges

Log Management	Future-proof your hybrid IT operations with seamless integration and automation, turning log data into actionable insights.
Automation Obsevability	Achieve unified, real-time visibility and control across your complex hybrid IT environment, from mainframe to multi-cloud.

“The Beta Systems Log Management solution empowers us to meet the entire range of IT governance, risk and compliance regulations that apply to Italian banks.”

Gennaro de Luca ICT Manager, Intesa Sanpaolo Group

KEY PRODUCT FEATURES

Explore What Beta LogZ Offers

Centralized Log Archiving
Securely store and archive job logs from z/OS, Windows, Linux/Unix.

Audit-Proof Documentation
Guarantees tamper-proof logging and auditability for archived data.

Cross-Platform Access
Provides simple, browser-based access environments.

Automated Incident Escalation
Applies a predefined management-by-exception concept.

Mainframe Power / XCF
Fail-safe production via cross-coupling facility.

Big Data / SMF Reporting
Automatic forwarding of application / security logs, ad-hoc SMF reporting.

Data Center Accounting
Quantifies individual system utilization and services rendered.

★ BETA LOGZ EXPLORER – PRODCUT ADD-ON

Direct Access to Mainframe Logs from Visual Studio Code

CUSTOMER SUCCESS STORY

How ITERGO Migrated Millions of Joblogs in 6 Weeks

ITERGO, the IT provider for the ERGO Group, successfully migrated millions of mainframe joblogs to Beta Beta LogZ. The project delivered significant cost savings, compliance readiness, and a modern IT infrastructure without affecting ongoing operations.

ITERGO

25%
Reduction in z/OS workload by utilizing zIIP processors for cost-optimized IT production.

6 weeks
Time to migrate millions of joblogs at ITERGO, ensuring business continuity.

12 months
Typical time to demonstrable ROI through reduced manual tasks and compliance efforts.
